2.1	Accessing Network Drives	5
2.1.1	Mapping a Network Drive on a Mac	5
2.2	Accessing Printers	7
2.2.1	Using PaperCutMF On a Mac	7

1 Wireless

1.1 CONNECTING TO THE WIRELESS

NOTE: Connecting to the wireless can only be done at school.

Connecting to the internet at the school is always a 2 step process. The first step is to connect to the school's wireless network.

The second step requires authentication via the Cyberoam Captive Portal (internet router) for internet access.

1.1.1 APPLE MACINTOSH

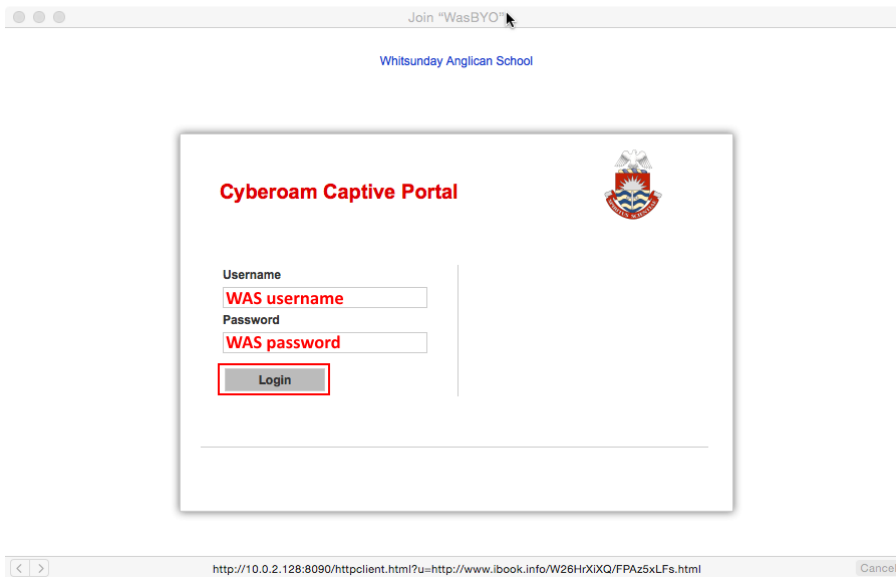

1. From within the Mac bar, click on the WIFI icon.

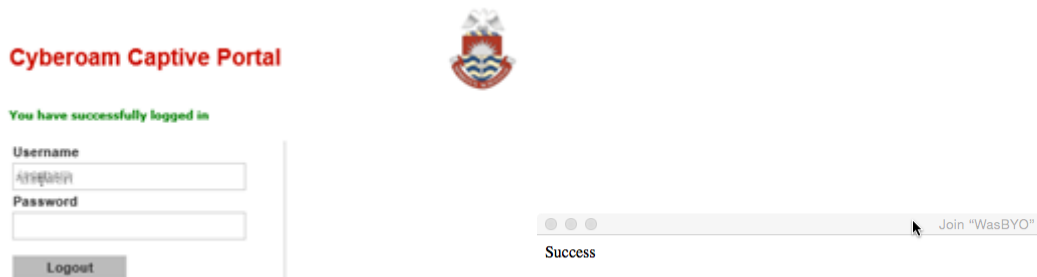

2. Click on the **WasBYO** network

3. Provide your **WAS ID username and password** and click on the **Join** button

4. The **Cyberoam Captive Portal** webpage will appear as the authentication mechanism for the **WasBYO** network. Provide your **WAS ID username and password**, click on the **Login** button.
NOTE: The WAS ID username in this instance is just the **WAS ID without the @was.qld.edu.au** suffix

5. The green text displaying **You have successfully logged in** should appear briefly and then transition to the above **Success** window.

2 Accessing Network Drives and Printing

NOTE: The downloading and installing of Office needs to be done at home..

The transition to BYO devices has taken away our ability as network administrators to deploy server settings such as network drives and printers to student devices. As such, we will require that students map access to network drives and printers manually.

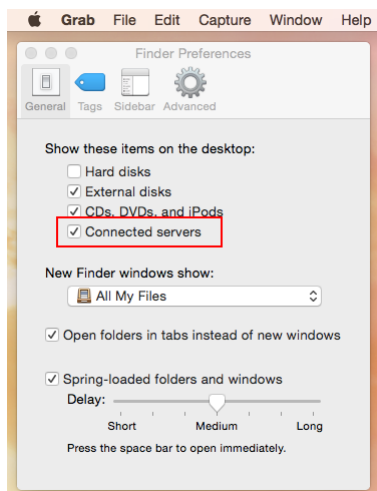

Our long term goal will see us move away from having students rely on network drives and printers to solutions where access to personal folders and access to printers is done through cloud or web based services.

Network drives will be replaced by OneDrive and network printers will be replaced by MyPrints (a web print solution).

2.1 ACCESSING NETWORK DRIVES

2.1.1 MAPPING A NETWORK DRIVE ON A MAC

NOTE: All the steps below can be done at home or at school, however the authentication step (5) will fail if the process is done from home.

1. From the Mac bar, select **Finder > Preferences...**
Ensure that the **Connected servers** option is ticked

2. From the Mac bar, select **Go > Connect to Server...**

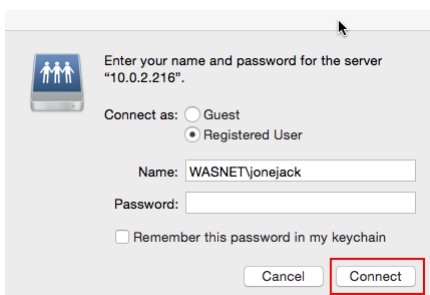

3. From the **Connect to Server** window, type one of the following paths as per table on the next page. Use the plus sign to add the server to the favourites list. Click **Connect**

Student Shared	smb://10.0.2.216/Shared\$
Student Subjects	smb://10.0.2.216/Subjects\$
Home Directory	smb://10.0.2.216/StudentHomes\$/Year_XX/USERNAME

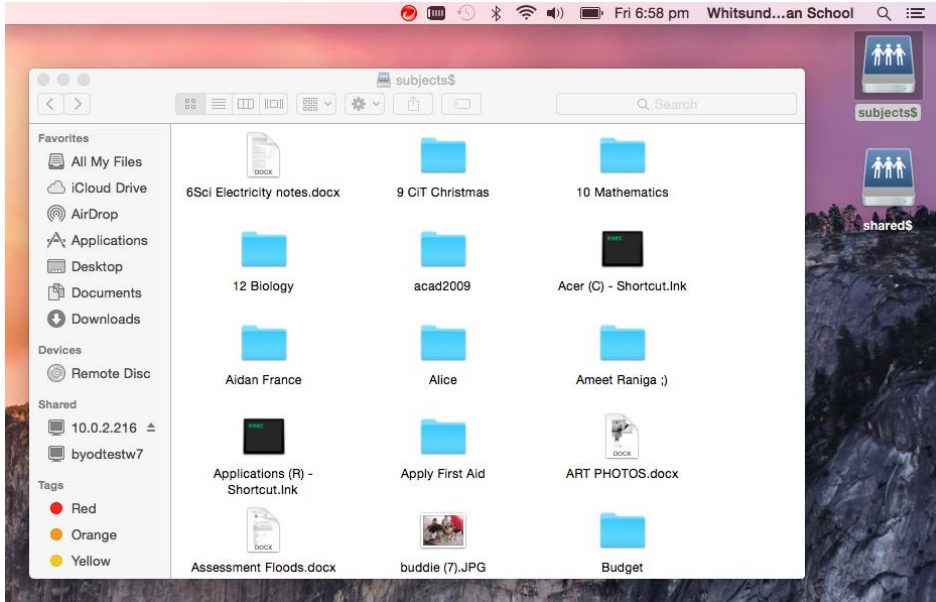

where Year_XX is your grade, ie Year_04
and where USERNAME is your school login

Eg: \\10.0.2.216\studenthomes\$\Year_04\jonejack

4. Provide your WAS ID username and password, however use the format WASNET<username>
Eg if your WAS ID is jonejack, then set the username as WASNET\jonejack
Place a tick into the Remember this password in my keychain
5. Click **Connect**

6. The network share folder window will open upon successfully connecting and authenticating. Additionally a desktop shortcut will also appear.

2.2 ACCESSING PRINTERS

2.2.1 USING PAPER CUT MF ON A MAC

NOTE: All the steps below need to be done at school.

1. Within your favourite Internet Browser, go to: <http://myprints> .You should create a bookmark for this link.

2. Provide your **WAS ID username and password**, click on the **Login** button.
NOTE: The WAS ID username in this instance is just the **WAS ID** without the @was.qld.edu.au suffix

PaperCutMF
